Lighthouse™ ERP

Key Features:

- Capturing Incremental data in Real time at it's origin

Our advance Oracle technology platform enables us to achieve this in a robust way

Benefits:

- Drill down from highest to lowest level (as many as 15 levels)
- Pending Exceptions : Pending Indent, Pending PO, Pending Inspection, Pending Accounts Approval, Pending Payment, etc.
- Assuring Data Quality through validations and security through authorisations
- Incorporating controls such as credit limits, dispatch not exceeding order qty
- Real time MIS, alerts, workflow enables data driven decisions
- Improving Productivity and Reduction in Process Cost and its cycle time
- Digitizing every aspect of the organization with Add-on modules, Apps, Third party devices & software
- Achieving best management practices

WHY LIGHTHOUSE ERP

	Technology Stack	     
	Industry Specific Solution	Lighthouse ERP has separate software objects (particularly for Raw Material , Production and Planning, QC, Sales & Marketing modules) for different type of Industry verticals and sub verticals.
	High Degree of Configuration & Customization	Within the Industry specific solution, we have vast no of configurable parameters to map large no of scenarios and process variants. We constantly add features and fields to incorporate further new ideas permissible within our framework. We are in a position to further customise as we are the original authors of our ERP.
	Scalability: ERP Grows as Organization Grows	Maps organization structure of a large business group comprising of large no. of legal entities, each entity having no. of locations/divisions , and each division having no. of plants. • Seamlessly accommodates Backend and Forward integration. • Powerful Add-on modules & Lighthouse Products can be added anytime in future with seamless integration on real time with core ERP. Both Core ERP and Add on modules derive power from each other.
	Mature Implementation Cycle	We give priority to crucial business processes instead of easy to implement modules. We are extremely familiar with Indian eco-system and intricacies of Accounts & taxation. We use several templates for Master Data for quick and quality roll out. We have several scripts to upload and validate opening balances and opening line items from old software. We extensively use tools like Any Desk, Video Conf. during implementation & post Go Live, reducing TCO.
	Personalized Customer Support	We have a dedicated Customer support cell of large manning. to give immediate support . Any support issue is logged in our customer support portal with a token no. We assign a single point of contact for every client.

A team effort of 30+ years have made our own management processes resilient and mature

The Add-On Products seamlessly integrated with the Core ERP enhancing the power of both.

LIGHTHOUSE ERP is a comprehensive business solution that harnesses the power of RDBMS and front end tech platforms to integrate all the departments working and make IT pervasive. We customize solutions for our clients' unique business needs. We are developer as well as system integrator, thus able to map best management practices minutely.

Batch Manufacturing	Process Manufacturing	Discrete Manufacturing
Exim & Domestic Trading	EPC – Project Management	Logistics Management

Implemented in 200+ diverse industries, sizes, countries with vast configuration capabilities.

Core HR & Payroll	Employee Self Service (ESS)	Recruitment Management
Time Office Management	Performance Management	Training Management

Acts as a catalyst for bringing effectiveness in marketing function and increases the productivity of sales & marketing personnel.

Web Portal for Sales Staff	Tour Plan & Tour Activity	Feedback & Complaint
Portal for Primary Sales	Sales Contract & Order	Target & Schemes
Portal for Secondary Sales	Branding & Marketing	Competitor Management

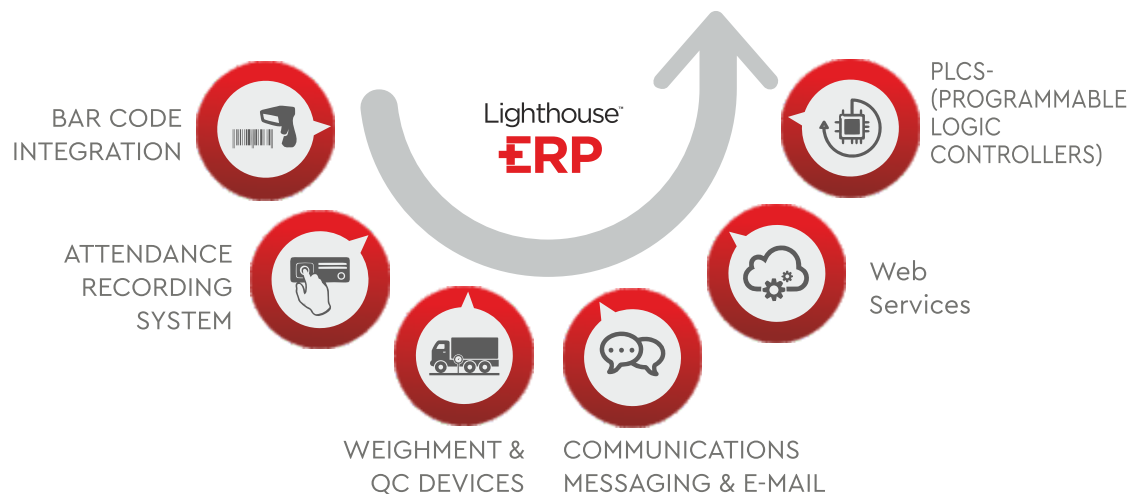

Integrated with Core ERP gives immense power to be informed of key MIS and to give approvals while on the move.

ERP Transaction Approval	Production Shop Floor App	Project Mgmt: Site Reporting
Key MIS Reports on Mobile	Task Management	Warehousing & Bar coding

A comprehensive web procurement solution for procuring material and services, selling by product. Real time integration with Lighthouse ERP makes web procurement a seamless process of MM module.

eProcurement Solution	Reverse Auction	Commodity Pricing
Freight Order Management	Forward Auction	Buyer/Seller Portals

Synergy of seamless integration of various software products from one single source.

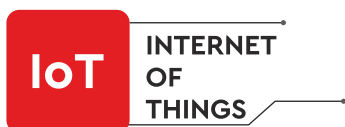

BI Tools collect and process large data from heterogeneous sources and create insightful reports & dashboards.

- Strategic Dashboards** : Top-line organizational KPIs Strategic goals, such as achieving KPI targets.
- Analytical Dashboards** : Trends or deeper insights Analytical goals, such as visibility into key process.
- Operational Dashboards** : Data awareness and time sensitive data Employee awareness and tracking against goals

BENEFITS:

- Exceptions & Trends : Track progress and maintain KPI's benchmarks
- Actionable warnings : Make better decisions with outcome analysis
- Co-relation features : Spot changing scenarios and adapt the view
- Enhance as you go : Maintain a clear picture of impact and returns

The Internet of things IoT is the extension of Internet connectivity into physical devices. Embedded with electronics, Internet connectivity, these devices communicate and interact with others over the Internet, and they can be remotely monitored and controlled. The data so collected can interface with ERP processes in real time.

We use all our accumulated experience in designing large database application to custom develop software solution for product conceived and marketed by others.

The portal serves more than 35,000 branches of Public sector banks like SBI, PNB, PSB, IoB, Indian Bank, Andhra Bank & more for filing TDS statutory returns in timely, centralized and 100% error free manner. It has brought hundreds of crores in savings by avoiding late filing fees, Interest and Penalties

- For RTGS Bank payments
- For Exchange Rate extraction
- For Live Commodity pricing

ERP PROJECT IMPLEMENTATION:

- Consulting and Identifying manual processes in business work flows
- Detailed system design process in AS-IS Study & TO-BE Blueprint
- Automating the Business Processes through ERP Processes.

IT SYSTEM AUDIT:

- Outline Infra Setup, System Usage Policies, Specify Access Controls.
- Migration of full education Oracle Application from Developer 6i to Developer 12c
- Providing selective Lighthouse modules in SAP working which will download data in Lighthouse from SAP and upload Lighthouse data in SAP
- Migration from Tier I (SAP/Oracle EBS) ERP to other ERPs

All components and links in IT infrastructure from one single source delivers an optimized, robust and fine tuned holistic IT system.

HARDWARE & NETWORKING

- Enterprise Server & Storage solutions
- Database & Applications Server
- Networking Solutions
- Security solutions

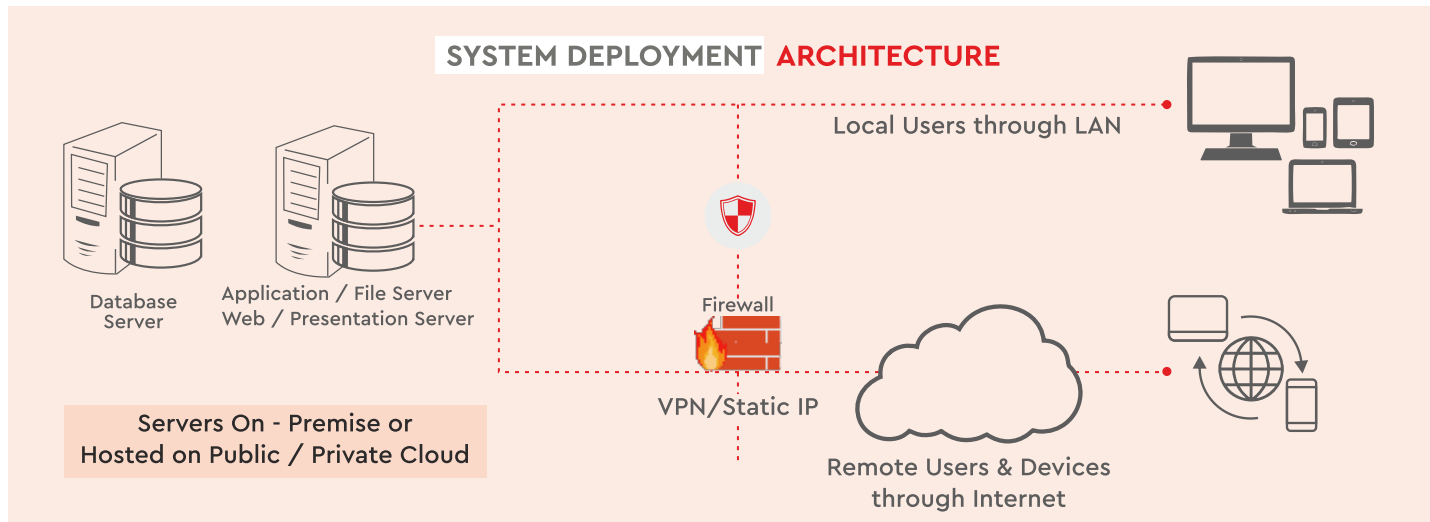

SYSTEM SOFTWARE LICENSES & INSTALLATION

LIGHTHOUSE SIGNATURE REPORTING OPTIONS

Power of Lighthouse ERP reporting options :

All reports are real time to drill down to the last level extract into Excel, several filter conditions can be applied, cover each and every transaction and process of ERP. Total no. of report engines, parameterized queries, dashboards shall exceed 200.

Standard & Customized Fixed Format Report

- Industry standard and specific operations, financial and revenue performance reports.
- Reports which are periodically required in pre-defined format for Statutory & MIS purpose.
- Regular reports being used day to day at departmental levels such as Daybook, Stock / Account Ledger, Registers and so on.

Parameterized Queries

- All the fields in the given context are listed in homogenous groups user selects choice of operator <, <=, >, >=, =, LIKE and a value on which query is to be applied. Any no. of fields can be selected for extract a long query.
- Further drill down is available to the transaction level, it is literally finding the needle in the hay stake.

This screenshot shows a detailed ERP report interface. It features a top navigation bar with various menu options. Below this, there are several data tables with columns for dates, amounts, and descriptions. The interface includes numerous filters and dropdown menus to refine the data. The bottom section shows a summary of the data, including totals and averages.

Report Engines

- Most powerful and flexible to customizing reports on multiple parameters and groups by selecting columns, sorting order, filter conditions.
- User specific conditional reporting or generate exception report.
- Thousands of combinations are possible using one single user interface.
- The specific can be saved for future recall.
- The report extract can be taken into Excel, HTML, PDF, CSV, etc.

This screenshot displays a report engine interface. It shows a list of reports on the left side, with columns for report name, date, and status. On the right side, there are various filters and options to customize the report. The interface is designed to be user-friendly and flexible for generating different types of reports.

Dashboards

- Data is pulled from more than one context
- Very powerful filters enable real time summarized information on category and conditions.
- Drill down to details upto last level (voucher).
- Report can be extracted into Excel or laser printer.

This screenshot shows a dashboard with a title 'Quotation Comparison Dashboard'. It features several charts, including a bar chart and a pie chart, which provide visual representations of the data. Below the charts, there are data tables with columns for various metrics. The dashboard is designed to provide a comprehensive overview of the data at a glance.

Executive MIS Report on Mobile

- Get real time update with Mobile based Executive MIS Reports.
- Fund Status, Debtors / Creditors Ageing, Order Status, Sales Analysis, Spend Analysis, Production, Inventory etc.

Business Intelligence (BI) Tools Dashboards

BI Tools collect and process large data from heterogeneous sources and create insightful reports & dashboards.

LIGHTHOUSE MODULES & PROCESSES

CORE PROCESSES:

Processes designed, to achieve organization's major functions / departments and Integrate them on one platform

ADVANCE PROCESSES:

Provide additional functionalities in specific area or for industry-specific features

FINANCE & TAXATION

Accounts General - (Cash / Bank / Journal)
Accounts Payable - (Purchase & Expense)
Accounts Receivable - (Sales Accounting)
Accounts Approval- (All FI Postings)
Payment Bill Tracking - Allocations
Bank Reconciliation
Provisional Journal
Ledgers / Trail Balance / Balance Sheet
Div wise P&L-BS & Multi entity combined BS
GST & Waybill Management
TDS / TCS Management
General Revenue Management
Expense Detail Management

PLC / DCS / QC Lab Devices Integration

WHAT OUR CLIENTS SPEAK ABOUT US

Any Business in Life is successful when it gets repeat orders – Devdutt Pattanaik

MADHAV ALLOYS
PVT. LTD.

Sudhir Goyal
Managing Director

12-Aug-2019

We implemented core modules of Lighthouse ERP in April 2017 in our steel plant... we have added large no of Add On modules like HRM, CRM, Mobile Apps. Lighthouse has nicely implemented Plant Maintenance module, a high priority for us. We have also extended Lighthouse ERP in our ERW Pipes plant in 2018, Lighthouse capability in customizing and simulating various scenarios is commendable. Their on line support is excellent and helps us achieve continuous improvements.

AMR INDIA
LIMITED

Ram Ojili
Managing Director

10-Aug-2019

Lighthouse ERP team consisted of competent and professional consultants, who fully understood our business requirements and the implicit needs of our users.

Most importantly, the ERP project in Mining domain was well managed and was completed within the committed time frame.

SUPER
SMELTERS LTD

Sanjay Chaudhary
CFO

20-Aug-2019

Lighthouse has implemented Oracle based ERP in our three steel plants in 2009. Lighthouse upgraded to their enhanced version V15 and further customized as per our requirements. They have smoothly incorporated migration to GST in all modules successfully.

Their quality of services is excellent and we are being satisfied, recommend Lighthouse ERP for all the industries.

Our Geographical Spread

CORPORATION

Prakash Chari
Director

9-Aug-2019

We have been using Lighthouse ERP since 2012 in our group of organizations engaged in manufacturing of Transmission Line Hardware items. Lighthouse provided customized solutions for several of our requirements which are typical of Power Transmission industry.

Subsequently, Lighthouse incorporated several add-on modules for our evolving requirements both in terms of enhancement of productivity and functional outreach.

Deepak Das
Group IT Head

16-Aug-2019

We were amongst the first five clients of Lighthouse ERP in 2006. Installed ERP in our group wide steel plants and corporate office having large users base.

An innovation : Lighthouse suggested to install a RFID tower on a hill to achieve clear line of sight.

In the intervening period, we implemented Oracle Apps in one of our group companies, however, being used to comprehensive coverage of our processes in previous solution, after couple of years we decided to revert to Lighthouse ERP.

Nageshwar Rao
Head IT & MIS

12-Aug-2019

Lighthouse implemented ERP in our Blast Furnace Plant in 2014. Several complex requirements/ scenarios were customized...

We again deployed ERP to our forward integration in EoF, LRF & VD, CCM and alloy steel rolling mill in 2016 with high level customization specific to alloy steel making and rolling.

Several innovative Add on solutions like third party device, Plant Maint., Prodn. Targets, Rolls Mgmt., Accrual Acct. were seamlessly integrated... We are happy with their day to day support by a dedicated team ...

R. Ravishankhar
Group Financial Advisor

19-Aug-2019

We have been using Lighthouse ERP for our Steel Rolling Mill, Epoxy Coating and Weld Mesh mfg plants since 2009. Under AMC,

ERP is well supported by Lighthouse team online, literally making it almost an instant service. Lighthouse as a professional backup team and we are very comfortable with them.

Anyone who may think of giving them a chance to be an ERP provider, Lighthouse would be an ideal partner. Our experience is that they are highly competitive and very reasonable in terms of cost.

*Not To Scale

Ramesh Agrawal
Director

10-Jul-2019

We implemented Lighthouse ERP in 2007 in our main group company. In Oct 2012 we upgraded the ERP to their much improved version V15. We also replaced SAP B1 in another group company and also deployed Lighthouse ERP at our two newly acquired steel plants. Lighthouse constantly helps to meet our growing needs, e.g. a bank payment API to manage our large no. of scheduled payment. We are happy with Lighthouse for their seamless integration of ERP to Group wide companies and it is running smoothly through out.

Ajay Kanoria
Director

11-Aug-2019

Lighthouse team developed a tailor made production planning system for our Threading Tap Manufacturing unit, which we are successfully using since 2008.

There are 8 to 10 thousand varieties in production and it would not be possible to systematically manage the production without the ERP software. Lighthouse also created a proper coding system to manage our 15,000 finished goods combinations having more than 12 technical parameters ...

Shruti Sharma
Senior President

20-Aug-2019

Lighthouse, implemented ERP in 2005 in our 100+ years old organisation in two plants and many depots/branches.

We appreciate the special efforts taken to train our tradition bound human resource in adapting to ERP. They highly customised ERP solution for FMCG domain-particularly a very exhaustive sales promotion incentive scheme, which is very crucial in our line of business. This automated the production planning, dispatch and billing and reduced the efforts to a fraction of what it was taking previously...
